CALL FOR PAPERS

## Industrial Track

### CibSE INDUSTRIAL TRACK

CibSE is the leading research forum on Software Engineering in Iberoamerica. The main objectives of this conference is to promote high quality scientific research in iberoamerican countries, supporting the researchers in this community to publish and discuss their work, also fostering collaboration and cross-fertilization among research initiatives.

The CibSE INDUSTRIAL TRACK was introduced last year to provide a specific forum for high quality submissions focused on industrial practice and applications of software engineering foundations, methods, practices, processes, and tools. Papers should represent experience reports or empirical work using diverse methods such as case study, ethnography, action-research. We welcome, in particular, results of partnerships between industry and academia in any topic related to Software Engineering. As the main goal of this track is to provide further insights into software engineering practice in industry, an extensive description of related work or background material is not required.

### SUBMISSIONS

Authors are invited to submit **papers in English, Portuguese, or Spanish** conforming to the LNCS style, 6 to 10 pages long, via EasyChair at <https://easychair.org/conferences/?conf=cibse2016industrial>

All the accepted papers will be published by the organization in a book with ISBN number. In addition, the papers will be indexed by DBLP.
